

Turf Equipment Source

Turf Equipment Source (TES) is your leader in Pre-owned turf equipment, Bernhard Express Dual Grinders, and specialty equipment by BLEC, and SISIS Equipment .

We also offer:

Contract Services that include: Drainage installations, Deep Aeration, Sand Slit Injection, Deep tilling, Sod Stripping and Removal, Clay Infield Tilling, Verticutting / De-thatching, Sand Slit Injection, Topdressing, Seeding, Over seed prep, Reel Grinding, and Service Contracts available.

TES can provide you with budget saving programs to help you save on water, have healthier and longer lasting turf, and reduce labor expenses with our specialty equipment and services.

Drainage Installations: TES can install all types of drainage pipe with our AFT Wiz Wheel Trencher . Up to 4000 Linear feet per day. Install a salt leaching system that guarantees you to flush salts and water out of the turf grasses for healthier and longer lasting turf.

Deep Aeration: Deep linear aeration up to 10" deep that will guarantee compaction relief and better drainage in the hardest of grounds. Core aeration is also available for greens, tees and fairways.

Sand Slit Injection: Inject up to 80 tons of sand per acre in the ground and be playable immediately after. Guaranteed to reduce salts, promotes root growth, and helps create a flushing system.

Tilling of turf grasses and seed /sod prep: Deep till with the **Bleavator**, a reverse tiller that buries rock, levels and rolls in one pass. Till in sand, gypsum, or any blend that can help reduce your salts by half guaranteed.

Sod stripping and removal with the BLEC Combinator: Removes up to 2" of material in one pass, levels and conveys into a trailer, ready for sodding or sprigging..

Verticutting / De-Thatching, Turf renovation: Vertical mowing is beneficial for SW turf grasses. Thinning the grass out for transition is a must throughout the summer months leading up to over seeding. This will give you healthier grass that will last longer and will reduce the amount of watering and fertilizing and will promote root growth.

Top dressing: Top dressing a clay or sand field is beneficial for the Bermuda grass growth, and will reduce the salts in the turf grasses. Top dress after aeration and work the sand into the ground for healthier turf grasses.

Over Seed Prep: TES offers a wide range of over seeding prep work such as: de-thatching, sweeping scalping, seeding, top dressing and fertilizing.

Bernhard Express Dual and Anglemaster Grinders:

Cutting with a sharp reel will promote a healthier plant and a more consistent playing surface, greatly reducing maintenance costs. Sales, mobile reel grinding and reel service available.

Service contracts: PM Service contracts are available to help you maintain all of your equipment to ensure maximum life of the equipment.
